

DIRECTIONS

The Gallery System Craft Hook

These hooks fit both The Gallery System and Slimline Stainless Steel Cable and Clearline hangers.

DIRECTIONS: Loosen the screw using the Allen key provided. Feed the end of the hanger through the hook body. Slide to the required position and tighten with the Allen Key. You can now attach to your rod that has been threaded into the pockets on your quilt.

MAXIMUM WEIGHT: 6kg (13 lbs) per hook on both the Stainless Cable and Clearline hangers.

NOTE: Using two hooks per quilt (one each end) will double the maximum allowable weight.

The Gallery System Extender Craft Rod

TO EXTEND THE ROD:

1. Hold the smaller of the two rods with one hand on each end.
2. Twist your **right hand away from you** and your **left hand towards you** to loosen.
3. Gently pull both ends outward until you reach the desired length.
4. To lock in place, twist your **right hand towards you** and your **left hand away from you**.
5. You can now thread into the pockets on your quilt ready to hang on the wall.

Small Extender Craft Rod (500mm to 775mm)

Medium Extender Craft Rod (750mm to 1200mm)

MAXIMUM WEIGHT: Maximum of 10kg on one Extender Craft Rod.

NOTE: Multiple hooks can be used on one hanger to display quilts one under the other. However, do not exceed the maximum weight as specified above for each Extender Craft Rod.
